Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to an electrical energy storage device, classified in class 361, subclass 517.
- II. Claims 11-20, drawn to a method for securing a protective housing, classified in class 29, subclass 25.41.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the methods as recited by claim 11 can be done in an alternate order i.e., step d could be after step e.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael Scalise on August 6, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
